SUMMARY

Motivated and detail-oriented individual with hands-on experience developing practical digital solutions for real-world needs. Strong foundation in problem-solving, system development, and user-focused design, with the ability to create efficient and reliable applications.

WORK EXPERIENCE

IT Specialist Intern — Nutech Hardware and Software Solutions

February 2025 – April 2025

- Developed a responsive project management website using Adalo.
- Integrated Zapier with Gmail to send automated notifications for verified users.
- Improved usability and accessibility across devices.

PROJECT EXPERIENCE

Furrfectionist (Mobile App)

- Developed an Android app that connects pet owners with verified pet sitters.
- Added features for booking, messaging, and user reviews.
- Built the app using Java/Kotlin in Android Studio with Firebase for backend services.

Hotel Management System

- Developed a hotel management system with booking, guest management, and admin features.
- Built the project using PHP, MySQL, HTML, CSS, and JavaScript.
- Implemented reservation tracking, guest records, and room management features.

VOYA — Adventure Travel Landing Page

- Developed a responsive landing page for a fictional adventure travel company.
- Built the project using HTML, Tailwind CSS, and JavaScript.
- Added responsive navigation, animations, and interactive UI sections.

Local Products REST API

- Built a RESTful API for a local products marketplace using Node.js, Express, and MongoDB.
- Implemented JWT authentication, role-based access control, and password reset via email.
- Applied security best practices including rate limiting, XSS, and NoSQL injection prevention.
